Subject: RE: Animas viewer - water features ? Upper Animas creek names - Kitti Mack Tailings

Steve,

The NHD Plus dataset has Minnie Gulch incorrectly named as Pole Creek. I removed the NHD Plus data from the site viewer and replaced it with a 1:24000 stream layer we have from Colorado Department of Wildlife. The CDOW data should be adequate for the geographic area of the site.

Soon I will be converting the site viewer to JavaScript, allowing you to run it on the new tablets that your group should be receiving.

Subject: Animas viewer - water features ? Upper Animas creek names - Kitti Mack Tailings

John,

We have some discrepancy with names of water bodies from the viewer as compared to the maps (and common names). On the south and north of the Kittimack Tailings, respectively, the Maggie and Mini Crks (gulches) are identified on the local maps. However, the Animas viewer

shows it as Pole Creek where Mini Ck (Gulch) is on maps, and the Maggie gulch is not labeled..
Can you guys look into this.

Thanks,

Steve
